Calender of Events	12

As I sit in my basement writing up this report the sun is shining on a beautiful early summer day. Draws are just about due and mine are in -- may we all get the draws we want and expect if it is our turn this year. By the time you are reading this you will already know the results of the draws and are planning for the upcoming hunting season or bemoaning the fact that once again we didn't get drawn.

Fishing season is well underway and all our fisher folks will be out at the rivers, lakes, and trout ponds trying their skill and the fishes willingness to bite. I'm preparing for a trip to Haida Gwaii(formerly the Queen Charlotte Islands) with my wife, dogs, and friends and looking forward to a lengthy trip of salmon, halibut, and crab fishing and of course the best seafood one can eat!

The agreement with the Nature Conservancy of Canada should be a done deal by publication as myself and Bob Chapman, our 1st. vice president , have signed the papers and this will ensure that the land the club owns will remain in its natural state in perpetuity. This protected land of ours is the largest continuous parcel in the county -- something we as members should be very proud of. Hopefully we can add to it sometime in the future.

The work party was attended by 34 of the club members and all work that Ken Sobkiw had planned was accomplished -- great stuff! It was a beautiful day and everyone who showed up had a good time and were exceptionally well fed at lunch and supper. Kudos to all that attended and thanks for the great meal goes to Tassi and Elaine Xenos and their helpers in the kitchen. Lets make it bigger next year -- maybe 2% of the clubs members will show up!

Gordon Kerr, Jim Clarke, Gaetan Richard, and others have finished the archery range and trail. If you're an archer and haven't seen the area you are missing the finest archery area in the province that I am aware of. We will be allowing the use of crossbows as well as vertical bows so every archer will have a place to practice. Archery season opens early so get out there and utilize the area. If you're not presently a bow bender stop in and see the area, it might make you decide to extend your hunting season as well.

Our self imposed quota of 3,200 members was met by late May/ early June and we have had to turn away numerous applications for membership. Unfortunately a few of those were previous members who had not renewed early enough to beat the quota and are now understandably upset. We've

had to set this cap as the ranges get very busy on weekends and especially so as we approach the fall and hunting seasons loom on the horizon and guns need to be sighted in. The executive had had complaints about the ranges being too busy so this was the solution. We will be capping our membership numbers again next year, so as an early reminder get your memberships early in December or January to avoid disappointment.

The black powder/Edmonton Brigade shoot was very well attended and everyone had a wonderful time -- watch for pictures and descriptions in this newsletter. There's always room for "newbies" at this event so contact Neil Usher if you're interested.

The trap range is running again and Wednesday evenings and Sunday afternoons are generally busy with a strong contingent of ardent scattergunners. Now if I could only break 25 straight! Come out and join the fun and practice up for the lengthy bird seasons we are blessed with. Practice might not make perfect but it sure helps with more birds hit to shots expended.

May your summer go as well as you have planned it and until next time -- tight lines and straight shooting!

Pat Harris

Nature Conservancy

Important notice about hunting on lands owned by Nature Conservancy of Canada–Alberta Region

Please read carefully

The Alberta Region of the Nature Conservancy of Canada (NCC) is implementing new measures to improve access management and hunting opportunities on properties. All NCC land is private property. Each property NCC owns is unique and human access is managed on a case by case basis, based on NCC's conservation priorities.

Starting in 2012, NCC is implementing a new system for granting hunting permission to streamline the application process and provide equal opportunity for everyone who applies. THERE IS NOW A ONE TIME ACCESS REQUEST PERIOD. **HUNTING ACCESS APPLICATION FORMS MUST BE RECEIVED BY MAIL AT NCC's CALGARY OFFICE BEFORE AUGUST 17th.** HUNTING REQUESTS WILL ALL BE PROCESSED BY SEPTEMBER 2012. Hunting requests outside of this time frame will not be considered (with the exception of the spring 2013 turkey hunt).

- Each INDIVIDUAL wanting to hunt needs to apply, although more than one person can be named on the application form (to facilitate access for groups of hunters).
- On some properties there may be more applicants than hunting opportunities. In these cases, a lottery will be conducted.
- Be aware that specific dates may be assigned to various hunting parties in order to provide successful applicants with a high quality hunting experience. If you have specific hunting dates in mind, please indicate those dates in your application.
- Anyone found being disrespectful of NCC land, wildlife, neighbors or neighboring property will be refused access in the future. Individuals found on NCC property without written permission for the time period specified will be prosecuted for trespass.

Everyone who applies will be notified as to whether they were successful or not in gaining permission by September 14th, 2012. Hunters successful in gaining access to lands through a lottery will receive a phone call to schedule access dates. No other hunting access will be granted over the course of the fall or early winter.

NCC strives to provide hunters with a high quality hunting experience with a better than average opportunity to harvest game, and asks for your help in realizing this goal. NCC is interested in cultivating long term relationships with individuals who will act as land stewards when they are out hunting. Please abide by all provincial hunting regulations, and like any other private property - obtain permission, use respect and don't spoil it for others. Best of luck to you this hunting season.

Sincerely,

NCC Alberta Staff

THE NEXT NEWSLETTER WILL BE OUT IN NOVEMBER 2012. IF YOU WOULD LIKE AN ARTICLE INCLUDED IN THE NOVEMBER NEWSLETTER PLEASE HAVE IT SUBMITTED BY OCTOBER 15, 2012.

ARCHERY

Gordon Kerr

2012 ARCHERY PROGRAM TAKES A MAJOR LEAP FORWARD

When I assumed the Chair of the SPF&GA Archery Program last year I really wondered how we could do all the work needed to upgrade our facilities. Talking and planning didn't get the job done.

Gaetan Richard, Special Projects Chair, said he would put some priority on the Archery Program, but I would not have guessed how great it would be. Gaetan put forward a funding proposal to the Executive Committee, and it was approved. Our plans were in place so this was like a shovel ready project. All of our clubs' archers and would be archers owe Gaetan and Jim Clarke, Range Area Manager, a real vote of thanks for the work they contracted and for the actual physical labour which both of them did on site.

Our range area had become badly run down. Now it is virtually all new and expanded, perhaps to become the best in Central Alberta. The general range has been expanded almost to double its effective size, leveled and grassed. The number of fixed target butts has been doubled in number and vary from one at 10 M; two at 20 M; 2 at 30 M; 2 at 40M; and one at 50 M distance. On July 7 this year's construction was virtually finished with the placement of small roofs over each target to protect from sun and rain damage. The broad-head target is now fully operational. A roll of tar paper has been placed in the upper roller casing (after the attached photo was taken) Just roll down the tar paper and tape or pin your target to it. You can then check your broad-head arrow flight by shooting through the paper into the sand behind it. Sure it will dull the broad-heads but you can replace the blades or re-sharpen. At least you will know if they are tuned for broad-heads instead of target points.

The road in to the site has been freshly graveled. Our poor old storage shed has been retired and replaced by a brand new one. Archers who have not been there this year will hardly recognize the place.

One other new feature which seems to be working well is the 15 foot (5 meter) shooting tower which is only 1.3 meters high. This "tower" is at the west end of the range, has a shooting lane down a steep slope with the target 15 feet (5 meters) below and 20 yards (about 18 M) horizontal distance. We now have a safe "tower" which simulates a 5 meter tree stand and a target at 18 meters distance. Come out and give it

a try. Let us know what you think of it.

For the enjoyment and safety of everyone let's review the rules of the Archery Range.

- All members of the SPF&GA may use the Archery Range.
- All types of bows are welcome, i.e. primitive, long bows, recurves; compound, crossbows or any other that shoot an arrow.
- Target points are allowed on all targets. Broad-heads are banned from all targets **except the one specifically designed Broad-head target**, with the sand pile backing. **No shooting** on the main fixed butt range is allowed except from the firing line. **No shooting is allowed ahead of or behind the firing line.**

Shooting on the Archery 3D Trail, is allowed from the trail or closer to the targets. No shooting is allowed across the trail.

As with gun ranges, the first person present becomes the range officer on the main fixed butt range. That person, or another if agreeable, **may call the RANGE CLOSED** to allow archers to change or put up targets and to retrieve arrows.

Bows are not to be taken down range but rather left at the firing line when **Range Closed has been called.**

No arrows are to be knocked or placed on a cross-bow except when the range is declared open and the shooter is on the firing line, ready to shoot.

*** All shooters under 18 years of age must be supervised by an adult member.**

Remember this is our range so let's take care of it.

Next year the plan is to further level the parking lot and firing line area so that the line will be under a sun and rain proof roof and the parking lot well graveled. Obviously only so much budget can be committed in any one year.

Where should the Archery Program go from here? I would like to see some organized shoots next year so we all might exchange information and get to know one another better. What kind of competitions should we consider? Should we seek having Archery Lessons? I am sure we can all learn something at such events. Are there further capital developments which would improve enjoyment of the range?

May good and useful times be had ahead.

ARCHERY

Gordon Kerr

August 2012 Membership Report

The membership cap set for 2012 was met in early June. Initially the cap was set at 3500, but was reassessed when memberships approached 3000. It was reduced to 3200 in response to heavy use of the ranges, high attendance at safety sessions and the time required to manage the membership.

Sales of range and family range memberships were stopped in early June. A limited number of memberships were provided to P&D to be used for the purchase of restricted firearms as a thank you gesture for their support. Once these memberships are exhausted there will be no more available.

Regular, family regular and youth memberships can still be purchased. Historically these memberships constitute a very small percent of the total membership. Upgrades of range memberships to family memberships are also available for existing members. These memberships can be obtained by mail or email of application forms to the membership chair. Memberships for 2013 will be available in early December of this year.

Membership Classes	Number	Percent of Total
Range	1660	51.25%
Family Range	467	14.42%
Dependents	1009	31.15%
Youth	58	1.79%
Regular	45	1.39%
	3239	100.0%

Table 1 shows a breakdown of the SPFGA members by membership classes. Slightly more than half of the membership (1660 persons) is represented by Range Memberships (51%). Family Range memberships include 467 individual members (14.4%). Dependents in family groups number 1009 (31%) with the average number of persons per family membership being 2.2 persons ($1009 \div 467 = 2.2$). Youth and Regular memberships combined number 103 (3.3%).

Use of the ranges on weekends has been heavy. Barry Kalvin our range monitor for this year has reported numbers of 100-150 persons on Saturdays and Sundays. Besides, checking memberships, Barry also conducts safety sessions when he is at the ranges, which is primarily on the weekends.

Suggestions from Barry that will make for a better shooting experience for members and less work for him are:

Wear your membership card so it is highly visible. The best way to do this is to use a lanyard around your neck to display your membership card.

Doing this means Barry does not have to ask you to

show your card. Barry has sold close to 100 lanyards at the ranges this year.

Remember to remove targets when finished shooting and discard them in trash cans.

Pick up your brass, especially on the rimfire range.

When driving vehicles to and from the ranges, clubhouse, and campground obey the speed limit which is 15 km/hr.

Consumption of alcoholic beverages at the ranges is prohibited. If you wish to celebrate and socialize after shooting, go to the clubhouse.

Use only paper targets. Beer and pop cans and bottles and other items are not to be used as targets.

Rich Rothwell and Daryll Murri
Membership Chairs

Sherwood Park Fish and Game Association Membership

Sherwood Park Fish and Game Association (SPFGA) consists of a variety of age groups, special interest groups, target shooters, hunters, fishermen/women, bird watchers, conservationists, etc. Members can enjoy the facilities and nature, can assist with conservation effort and can share their interests with other members. Members can hike, camp, participate in archery, and use firearms (rifles, handguns, shotguns, black powder guns). Youth under 18 years of age can learn how to fish in the stocked fish pond.

The Club WILL NOT tolerate any behavior that compromises the safety of our members, neighbors or the general public. Members must adhere to general rules regarding firearms and ammunition. Range rules are posted at shooting ranges and on the website (www.spfga.org). Members must observe posted shooting times.

SPFGA is affiliated with the Alberta Fish and Game Association (AFGA). Part of your membership fees are paid to AFGA. These fees provide members with insurance (while using the range and facilities), the Outdoor Edge Magazine, discounts at various businesses, and a combined voice on matters of common interest to government and other groups.

Membership Classifications

Regular Membership- No access to Shooting ranges.

Range Membership - Full access to all facilities including shooting ranges.

Youth Membership is open to all young people under 18 years of age.

Dependent includes a spouse/partner and their sons/daughters under 18 years of age.

Retailers do not sell Family Range or Family Regular memberships.

Note: All youth under 18 years of age must be supervised by an adult.

Family Regular Membership: one regular member, a spouse/partner and their dependent children under 18 years of age with no access to shooting ranges.

Family Range Membership: one range member, a spouse/partner and their dependent children under 18 years of age with access to shooting ranges.

Family Range Memberships and Family Regular Memberships DO NOT INCLUDE THE FOLLOWING:

Parents, brothers, sisters, grandparents, aunts, uncles, nieces, nephews, cousins, friends and in-law relations.

Children who live at home but are over 18 years of age Family Range or Family Regular classifications.

Other family members e.g. siblings/parents who reside with a member.

All Family Range Members and Family Regular Members must purchase their memberships as follows through the Membership Chair or the Membership Co-Chair.

Mail a completed application with appropriate payment to the Club. Mailing address is: SPFGA, PO Box 3098, Sherwood Park, AB T8H 3T1

-Call the Membership Chair or the Membership Co-Chair

-Email the Membership Chair at: membership@spfga.org

-At General Meetings

2012 Membership Fees are as follows:

Range	\$110
Family Range	\$150
Regular	\$55
Family Regular	\$75
Youth	\$20

Memberships

Richard Rothwell, Membership Chair

Range, Single Regular and Youth memberships can be purchased at the following retailers:

Milarm Co. Ltd.
10769 - 99 Street, Edmonton

NAMES AND INFORMATION ABOUT ALL DEPENDANTS LISTED UNDER FAMILY REGULAR AND FAMILY RANGE MEMBERSHIPS

This information is essential for dependent members under Family Memberships to qualify for Club Insurance.

Name	Birth Year	Relationship

BOTTOM BOUNCING

After chasing walleyes for over 20 years I believe bottom bouncing has to be one of the most successful presentations for locating and catching walleye. Trolling at a speed of about 1 to 1.5 mph you can cover a lot of water both horizontally and vertically, but I have caught fish trolling up to as fast as 2.5 mph. There are basically two styles of bouncer the "L" style and the quick change style. I prefer the quick change style because it allows me to change weights without having to retie, but both

work equally well. Pulling bottom bouncers is one of the few presentations you can troll over rocky bottoms virtually snag free, moving up and down breaks from 6 ft. down to 26 ft or deeper and back up to 6 ft. without ever changing gear or speed.

L STYLE

There are a few variations for rigging but I use one of three methods, pulling either spinnerbaits, floating

crankbaits, or a single hook on a long snell which is a popular setup for drifting the river at Nipawin. There are more successful presentations when fish are stacked up or holding tight to structure, but for

fishing large flats or locating fish, they can't be beat.

I use the quick change style bottom bouncers on a line slide which allows me to change snell length or bouncer weight without having to retie my rig.

Bouncer fishing is not really a finesse presentation in my opinion so I use baitcast reels and a medium to medium heavy 6 1/2 rod with a line rating of 8-17 lbs. Most of spinner rigs are tied with 12 or 14lb. fluorocarbon line, with a main line of either 14 or 20 superline, usually fire-line or power pro. Weight size will vary depending on depth but at the depths I fish in Alberta and Saskatchewan a 1-2 oz. bouncer is usually adequate. I tie the majority of rigs about 30 inches long and then slide the

weight up the line so that my actual spinner rig is about 4 feet behind the bouncer, about the same length or slightly longer when pulling floating crankbaits and vary the single hook setup from about 6 to 10 ft. depending on conditions.

The majority of my spinner rigs are tied with tandem hooks, about 4 inches apart, whether I am using leeches, minnows or

worms, but I use Gulp worms about 80 per cent of the time.

I have tried a large variety of blade and bead colors and sizes over the years and have some of the best success with #4-5 Holographic Colorado blades which are clipped in on a quick change clevis, and translucent beads. Basically all rigs are a variation of silver/black or chartreuse/orange. If the bottom is a bit weedy or the fish I see on the sonar are riding a little high off the bottom I have other rigs

tied with floats or spin-n-gloves which ride a bit higher in the water. There are times when you will continue to get "short hits" you can vary your trolling speed but I have found that if you fall much below .7 mph your blades will not spin very well. In this case I have some rigs tied up with smiley blades which will spin at about .2-.3mph, this also works well if your partner wants to pull lindy rigs, as you can offer both presentations at the same time.

As you can see bottom bouncers are a very versatile presentation that cover multiple depths, with different lures at different speeds, while constantly staying in the strike zone of the elusive walleye.....definitely a go to presentation.

GOURMET GAME

Gourmet Game.

The purpose of this section in the newsletter is to encourage our members to take advantage of the wild game they harvest and to enjoy not only the preparation required to produce a gourmet meal, but the end product that is enjoyed around the table. Many people that I have spoken to have become discouraged by their lack of success in preparing wild game. My intention is to provide recipes that have been tested by the writer and have proven to be a success when shared with others. My hope is that we rekindle an enthusiasm for preparing wild game and sharing it with our friends and relatives.

Goose Breasts Wrapped in Bacon.

I have found this recipe to be a big success whenever I have shared with others. People who have never eaten wild geese are amazed by the flavor and the inviting texture. This recipe requires the goose breasts to be marinated overnight. The final preparation is easy, and the breasts can be placed in the refrigerator until you are ready to barbecue them or place them in the oven. They are an excellent appetizer or can be served as a main course.

2-geese breasts, skinned and deboned.

1 inch piece of fresh ginger root-finely chopped

3 Cloves garlic-finely chopped

3 green onions-chopped

1/3 cup soy sauce

1/4 cup sherry or rice wine.

1 pound sliced bacon.

Toothpicks soaked in water

Wash the goose breasts with cold water. You can also soak these goose breasts in cold water for approximately 1/2 to 1

hour. This will assist in reducing the amount of blood remaining in the flesh, thus reducing the game flavor of the meat. I don't bother soaking the birds unless they are badly shot up. Cut the individual breasts into finger length strips, approximately the thickness of your finger. You will have approximately 4 to 5 strips per half breast. Wash all the breasts and place into a glass bowl.

In a separate smaller bowl, combine the ginger root, garlic, green onions, soy sauce and sherry. Mix well, then pour this over the goose breasts that are in the glass bowl. With your hands, mix well, cover with plastic wrap and place in the refrigerator overnight.

Cut the bacon lengths in half; you can count the number of lengths you will need if you remembered how many finger breasts you placed in the bowl. Working on a cutting board, remove a goose strip, secure one end of the

bacon strip to one end of the goose strip with a toothpick, wrap the bacon around until you reach the other end, then secure with another toothpick. Place on a clean plate and continue wrapping the remainder until completed. You can place these in the refrigerator until you are ready to cook. Reserve the remaining marinade for basting on the barbecue.

I prefer to cook these wraps on a barbecue, it is less messy and the flavor is much nicer. You can place these goose breasts in the oven at 400° on a wire rack placed inside a catch tray that will catch the bacon fat that is released upon cooking. You will need to rotate these goose strips, brush them with remaining marinade if you wish and cook until the bacon has been cooked and becomes somewhat crisp. Serve warm as an appetizer or hot as a main course.

You can change the flavor presentation by adding 1/3 cup of chili sauce and 1 teaspoon of Tabasco (regular Tabasco or chapoltie Tabasco) to the above ingredients. At times I split the recipe, adding a bit more heat to the chili sauce then letting my guests decide for themselves which they like best. If you split the recipe, make a second batch of the above marinade.

Dennis Ewanyk is an avid hunter and fisherman and an even more avid cook.
